Cleaning Method

- 1 Sweep the floor to remove any debris and dirt from surfaces.
For best results ensure floor has been rinsed with cold water to a neutral pH.
Pour the Floor Polish in a suitable clean bucket or tray.
- 2 Using a clean mop or applicator, spread the Floor Polish thinly onto the floor in straight lines.
- 3 Leave to dry for at least 30 minutes.
- 4 Once dry, apply a second coat of Floor Polish in straight lines at right angles to the direction used for the first application. To avoid build-up, leave a gap of approximately 10 cm at the floor edge.
- 5 For heavy traffic areas, a third coat may be applied.
