Clean Pro+ Product	Dosing	Application
<p>Destaining Powder</p> 	<p>1 scoop per 5 litres water (light stains) 2– 3 scoop per 5 litres water (heavy stains)</p>	

Cleaning Method

- 1 Ensure the powder is fully dissolved in the bucket.
- 2 For light stains, soak items for 15 – 30 minutes. For heavy stains, soak items overnight.
- 3 Rinse all items thoroughly with fresh clean water.
- 4 To clean tea urns, add 2 – 3 scoops per 5 litres water.
- 5 Allow the urn to heat up and then soak for approximately 2 hours.
- 6 Drain and then fully rinse with fresh, clean water.
- 7 Use a clean absorbent material to dry the urn fully before re-use.
