Gloves

Important

Toilets should be frequently checked to see if cleaning is required.

Clean Pro+ Product	Dosing	Application
Daily Toilet Cleaner 	Ready to use	
Toilet Renovator and Descaler 	Ready to use	
Urinal Channel Blocks Blue 	Ready to use	
Urinal Channel Blocks Yellow 	Ready to use	
Urinal Cleaner 	Ready to use	

Cleaning Method

- 1 Flush all toilets with lid closed.
- 2 For general daily cleaning use Toilet Cleaner. Using the nozzle, direct the toilet cleaner under the rim of the toilet and any other areas of the bowl or urinal. Leave in contact for 2 minutes. Brush with designated toilet brush and then flush the toilet or urinal.
- 3 For the deep cleaning and limescale / stain removal use Toilet Renovator and Descaler. Using the nozzle, direct the toilet cleaner under the rim of the toilet and any other areas of the bowl or urinal. Leave in contact for at least 15 minutes. Brush with designated toilet brush and then flush the toilet or urinal.
- 4 Where required, place blocks directly in the urinal units or channels to provide masking of odours.
- 5 Use Urinal Cleaner for daily general cleaning of reduced water urinals fitted with Urinal Caps. Spray Urinal Cleaner around all parts of the urinal bowl. No need to rinse.
- 6 Spray Urinal Cleaner onto problem areas of the toilets - floors and walls around urinals and toilets. Leave to work for a few minutes then wipe away any excess liquid. No need to rinse.
