Advances in technology and software mean that surveillance systems and new technology can pose an increased risk to people's privacy. If you are thinking of implementing new technology such as (CCTV, Face Watch, AI, Body or dash camera's, behavioural analytics, or Biometric data) that processes personal data, and identifies individuals, you need to do so in compliance with the UK's Data Protection Regulations (UK GDPR & DPA 2018). As a data controller you should ensure that you are: Registered as a data controller with the UK Regulator the ICO (www.ico.org.uk) / Have a lawful basis for processing the data and if you are processing criminal activity data you also need to identify a special condition for processing this data. / Complete a Data Privacy Impact Assessment to assess the risks and impacts on the interest and rights and freedoms of individuals and to document why the processing of the data is justified as fair, necessary, and proportionate and addresses a particular need. The capture of personal data should not be excessive and only processed for a specific purpose. / Provide sufficient privacy information to individuals such as signage, indicators, warnings and have a readily available privacy notice. / Have appropriate retention and disposal policies in place for any data that you collect. / Be able to retrieve and process the data for subject access requests or onward disclosure where necessary. Also, ensure you can efficiently blur or mask video footage where more than one person can be identified (in the event of a subject access request from one person). / Keep any data you have collected secure. / Ensure your teams are trained to deal with the technology and outcomes because of processing the personal data. / That you adhere to any relevant codes of practice such as the Surveillance Camera code of practice. The Biometrics and Surveillance Camera Commissioner (BSCC) offers a buyer's toolkit to assist you if thinking about these systems [Surveillance Camera Commissioner's Buyers Toolkit](#) (publishing.service.gov.uk)
